

KHANH HUYEN

UI/UX DESIGNER

Phone: 0328859929 | Email: tkhanhhuyen0484@gmail.com | Portfolio: huyensaigon.id.vn | Ho Chi Minh City, Vietnam

PROFILE

UI/UX Designer and Software Engineering student with 10+ months of hands-on experience across an in-house internship and freelance client work. Skilled across the full product design process — requirements gathering, user flows, wireframes, and interactive prototypes — through to polished UI and developer handoff. Combines a technical background (HTML/CSS, JavaScript) with an eye for detail to design clear, usable, and visually consistent products.

EXPERIENCE

UI/UX Designer Intern — EMC Group Joint Stock Company *05/2025 – 08/2025*

- Designed UI for apps, websites, and landing pages, delivering on time across multiple project cycles.
- Refined layout, color, and typography systems and defined UI states, improving usability and visual consistency across screens.
- Produced banners, visual assets, and interactive prototypes used in internal client demos.

Freelance UI/UX Designer — Independent *08/2025 – Present*

- Delivered end-to-end UI design for client projects spanning mobile apps, websites, and landing pages.
- Advised clients on layout and visual direction, raising overall UI quality and consistency of delivered products.
- Handed off pixel-accurate prototypes and clear documentation, enabling smooth implementation by development teams.

FEATURED PROJECTS

KidGuard App — Parental Control App

Owned the end-to-end UX/UI for a parental control app: parent dashboard, screen-time setup, device lock states, and a "safe play" mode for children. Used a calm palette and friendly illustration style to reduce parental stress during setup. [<https://huyensaigon.id.vn/kidguard.html>]

AI Voice Lock: Smart Note — Voice-Secured Note-Taking App

Designed a private, voice-locked note-taking app with AI-generated summaries: onboarding, voice-lock setup, notes list, and preview screen. Chose a blue-purple palette to reinforce a sense of security and intelligence. [<https://huyensaigon.id.vn/ai-voice-lock.html>]

ELOGI — Mobile E-commerce App

Designed a complete mobile shopping journey: search, filtering, product detail, seller chat, notifications, and order tracking. Used a mint-green system, rounded cards, and a clear CTA hierarchy to simplify the path to purchase. [<https://huyensaigon.id.vn/elogi.html>]
